3-POINT SECURITY AUTOMATIC DOOR LOCK

European technology in a North American Lock.

By simply closing the door, the upper and lower 3/4" latches will instantly engage.

Engaging the 1" deadbolt by turning the key from outside or the knob from inside, will block the top and bottom latch bolts, to make it a secure 3-deadbolt locking system!

- Intuitive North American locking function. No lifting of the handle required to engage locking points.
- 90 degree thumb turn to engage 1" central deadbolt function.
- The tapered latch bolts always engage the keepers upon closing of the door.
- Better security with three locking points securing the door.
